

Total Solutions for Floor Care - Sealers

Floor Sealer definition: in the traditional sense, it is the application of a floor sealer on top of the substrate but below the floor finish. It is between the two. By sealing the floor, you lay a protective barrier over the substrate. In addition, this provides a canvas for the floor finish.

Diversey can help you to choose the best floor sealer to meet your appearance and cost goals. Our floor sealers are part of a comprehensive floor care line integrating chemicals, application tools, smart machines, pads, training & support.

FLOOR SEALERS

Plaza® Plus ProX

Use on terrazzo, quarry tile, brick, slate, granite, marble, unglazed ceramic and Mexican tile. Exhibits exceptional gloss, leveling and long-lasting durability. Easy to maintain in conventional and UHS programs. Perfectly formulated to work on Terrazzo, Stone and Concrete.

JonCrete® ProX Matte Coming Soon!

Durable, low-gloss, low-odor sealer with excellent stain resistance for decorative and non-decorative concrete.

Over & Under® ProX

Sealer for all finishes used on resilient flooring. Seals pores of flooring and levels surface.

When selecting the right floor sealer, several key elements should be considered

- Substrate: What type of floor material will we be working on?
- Maintenance program: Conventional vs. Multi-Maintenance
- Available resources: Your available labor, tools & equipment, frequency and access to the floors.

Use the guide to select a floor maintainers that best aligns to your maintenance program
