

COMPREHENSIVE CAPABILITIES

Chem-Aqua provides comprehensive water treatment solutions that help you protect your critical water systems, promote safe and reliable equipment operation, and reduce the total cost of operation.

COOLING WATER TREATMENT

Comprehensive programs to control corrosion, deposits, and microbiological growth, conserve water, and improve efficiency.

PROCESS WATER

Essential chemical and equipment programs to remove or manage contaminants that can cause product quality issues and increased production costs.

AUTOMATION AND MONITORING

State-of-the-art equipment technology to monitor and control water treatment programs based on changing system demands.

ONLINE PROGRAM MANAGEMENT

Chem-Aqua provides online access to your reports, data, and documentation, with dashboard analytics to help you understand and manage your programs.

BIOFILM CONTROL SOLUTIONS

Protecting potable and industrial water treatment systems from problem-causing biofilms that can lead to serious problems.

LEGIONELLA RISK MANAGEMENT

Expertise and capabilities to help you develop and implement *Legionella* water management programs and execute emergency response protocols.

PREVENTATIVE CLEANING SOLUTIONS

Cooling tower cleaning and disinfection, coil cleaning, new system commissioning, and domestic water line chlorination.

DOMESTIC / POTABLE WATER SOLUTIONS

Supplemental disinfection, point-of-use filtration, domestic water inhibitors, and *Legionella* risk management.

BOILER WATER TREATMENT

Integrated chemical and equipment programs to control corrosion, scale, and carryover, minimize energy and water use, and improve efficiency.

INFLUENT / WASTEWATER TREATMENT

Chemical and biological programs to remove contaminants, improve influent and effluent quality, and enhance water recycling.

ANALYTICAL CAPABILITIES

Onsite water testing supported by full service laboratories providing water, microbiological, deposit, and failure analysis.

SOLID WATER TREATMENT

Environmentally responsible solids programs to simplify chemical handling, reduce spills, and eliminate drum storage.

WATER TREATMENT EQUIPMENT

Standard and custom manufactured water equipment including ion exchange (softeners, DI), membranes (UF, NF, RO), filtration, and chemical feed & control systems.

SMARTLINK® DELIVERY SERVICES

Point-of-use chemical delivery, empty drum pickup, and hands-free feed systems.

SPD CRITICAL WATER

Water systems engineered to provide an integrated water purification, distribution, and monitoring solution that meets AAMI standards.

ODOR CONTROL SOLUTIONS

Effective odor control technologies such as odoreXile®, chlorine dioxide (ClO₂), and acidified bleach.

On-Site Service & Expertise

Chem-Aqua has the expertise and commitment to help you solve virtually any water-related problem. Our **Comprehensive Capabilities** allow us to provide effective product, equipment, and service solutions that address the unique mechanical, chemical, and people requirements of each system.

Contact us today to learn more about how Chem-Aqua can improve your water treatment operations.
