

Integrated Water Treatment Solutions

Water is an essential component of the food and beverage industry. At Chem-Aqua, we have the products, equipment, expertise, and commitment necessary to address the unique heating, cooling, and process water requirements in the industry.

Our comprehensive line of products help to reduce corrosion, scale deposits, and microbiological fouling while meeting USDA, FDA, NSF, and CFIA regulations. We manufacture and support a full line of softeners, reverse osmosis, and filtration equipment to keep systems operating at maximum efficiency and conserve resources.

Food and Beverage Sectors Served

Agriculture

Beverage Bottling

Brewery

Canning

Cold Storage

Dairy

Meat, Poultry, & Seafood

Rendering

Program Benefits

Effective water and process solutions to help:

- Ensure regulatory compliance
- Reduce water and energy costs
- Improve operating efficiency
- Minimize equipment downtime
- Meet sustainability goals
- Maintain a safe workplace

Expertise and Service

Expertise and service is one of the most important aspects of our work. The economics and technical success of any water treatment program depends not only on chemical and equipment selection, but also on how well the program is managed. We are committed to providing high-quality service and are proud to offer one of the most comprehensive service packages in the water treatment industry.
